## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to 134, classified in class 134, subclass 1.
  - II. Claims 14-17, drawn to an apparatus for removing particles, classified in class 134, subclass 104.
  - III. Claim 18-21, drawn to an apparatus configured to accelerate particles, classified in class 250, subclass 492.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I & II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Specifically the method of claims 1-13 are drawn to particle removal, and apparatus in claims 14-17 are drawn to particle removal. The apparatus of claims 18-21 are drawn to particle acceleration and deposition apparatus. Thus inventions are not disclosed as capable of use together, have different modes of operation, different functions, or different effects.

Art Unit: 1746

4. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, specifically a heater.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Carol L. Druzbeck on 3/10/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gentle E. Winter whose telephone number is (703) 305-3403. The examiner can normally be reached on Monday-Friday 7:00-3:30.
